**"Seascape" oil on canvas 1950's by California artist Lucille Kent**

an accomplished California artist and a master at capturing the mood of the sea with her impasto technique, laying on thick layers with visible brush and painting- knife strokes as the sea almost comes off of the canvas; excellent condition; minor wear to frame; with old gallery label on the reverse; Kent once said "I feel I know the sea in most of its moods, but it will take years to get it all on canvas."
